

HABITAT MATCH

DRAW A LINE TO MATCH EACH HABITAT TO ITS DESCRIPTION

HABITAT	DESCRIPTION
mixed woods	large body of fresh water with red maple, beetle bung and sassafras trees around the edges
freshwater pond	little bluestem grass, pasture rose, cedar trees and blueberry bushes
Cedar Tree Neck headland	forest of mostly oak trees with hickory, beech and sassafras trees
north shore	extensive sand cliffs with a rocky beach
stream	a habitat with sphagnum moss and red maple trees, drained by a small stream
field	a sandy strip of land that separates Cedar Tree Neck Pond from Vineyard Sound
swamp	running fresh water with a beech grove and ferns along the banks
plantation	covered with shrubby heath and short cedar and sassafras trees that have been sheared by the wind
barrier beach	an area planted with one kind of tree, in this case red pine
